Achivement

1. Railway Reservation System

Developed the Laboratory Management System application on JAVA using spring framework and microservices. Used Postman and the client software for the first stage of the case study assessment during training program.

In that for backend I make use of spring boot and microservices to perform operations and secured it using JWT authentication. And uses MongoDB database. Angular used for user interface.

2.Capgemini Degreed Platform

Learnt the concepts of Git and GitHub, simultaneously applied the concepts for better learning. Developing the website for case study using Angular.
